Everyone counts!

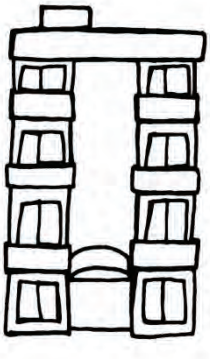
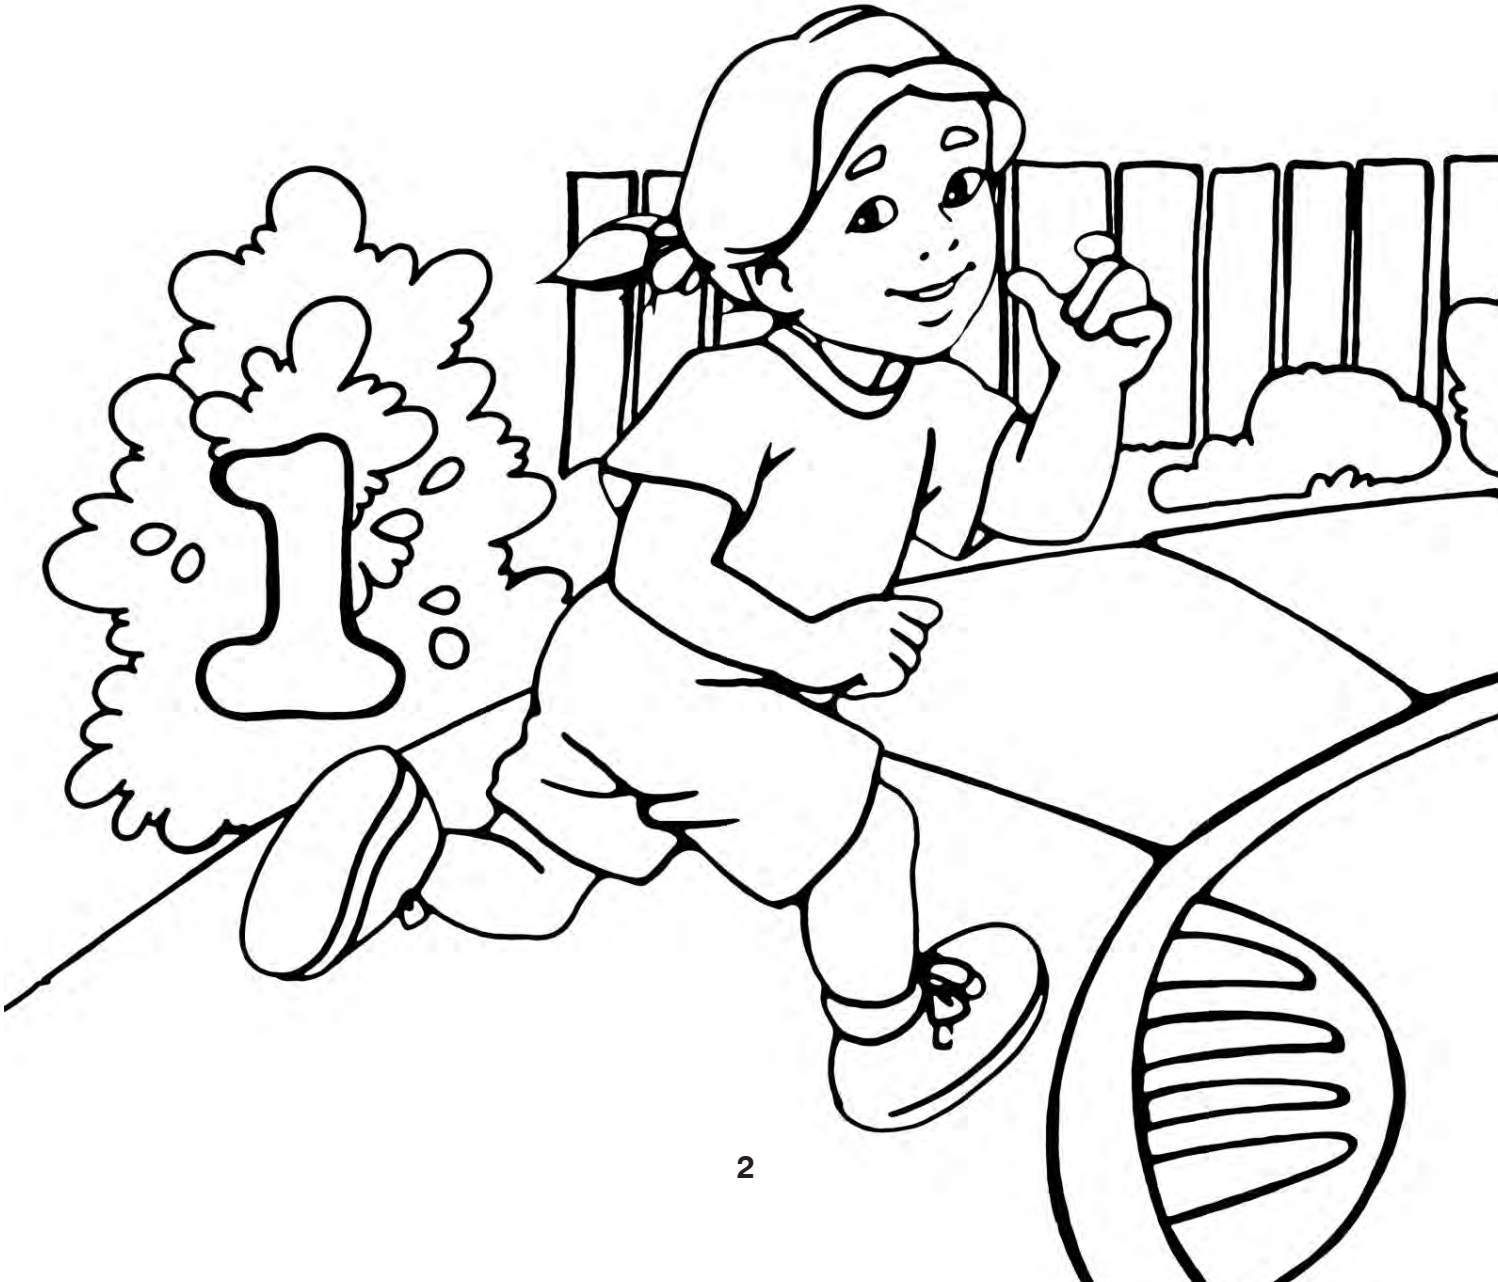
www.census2011.gc.ca

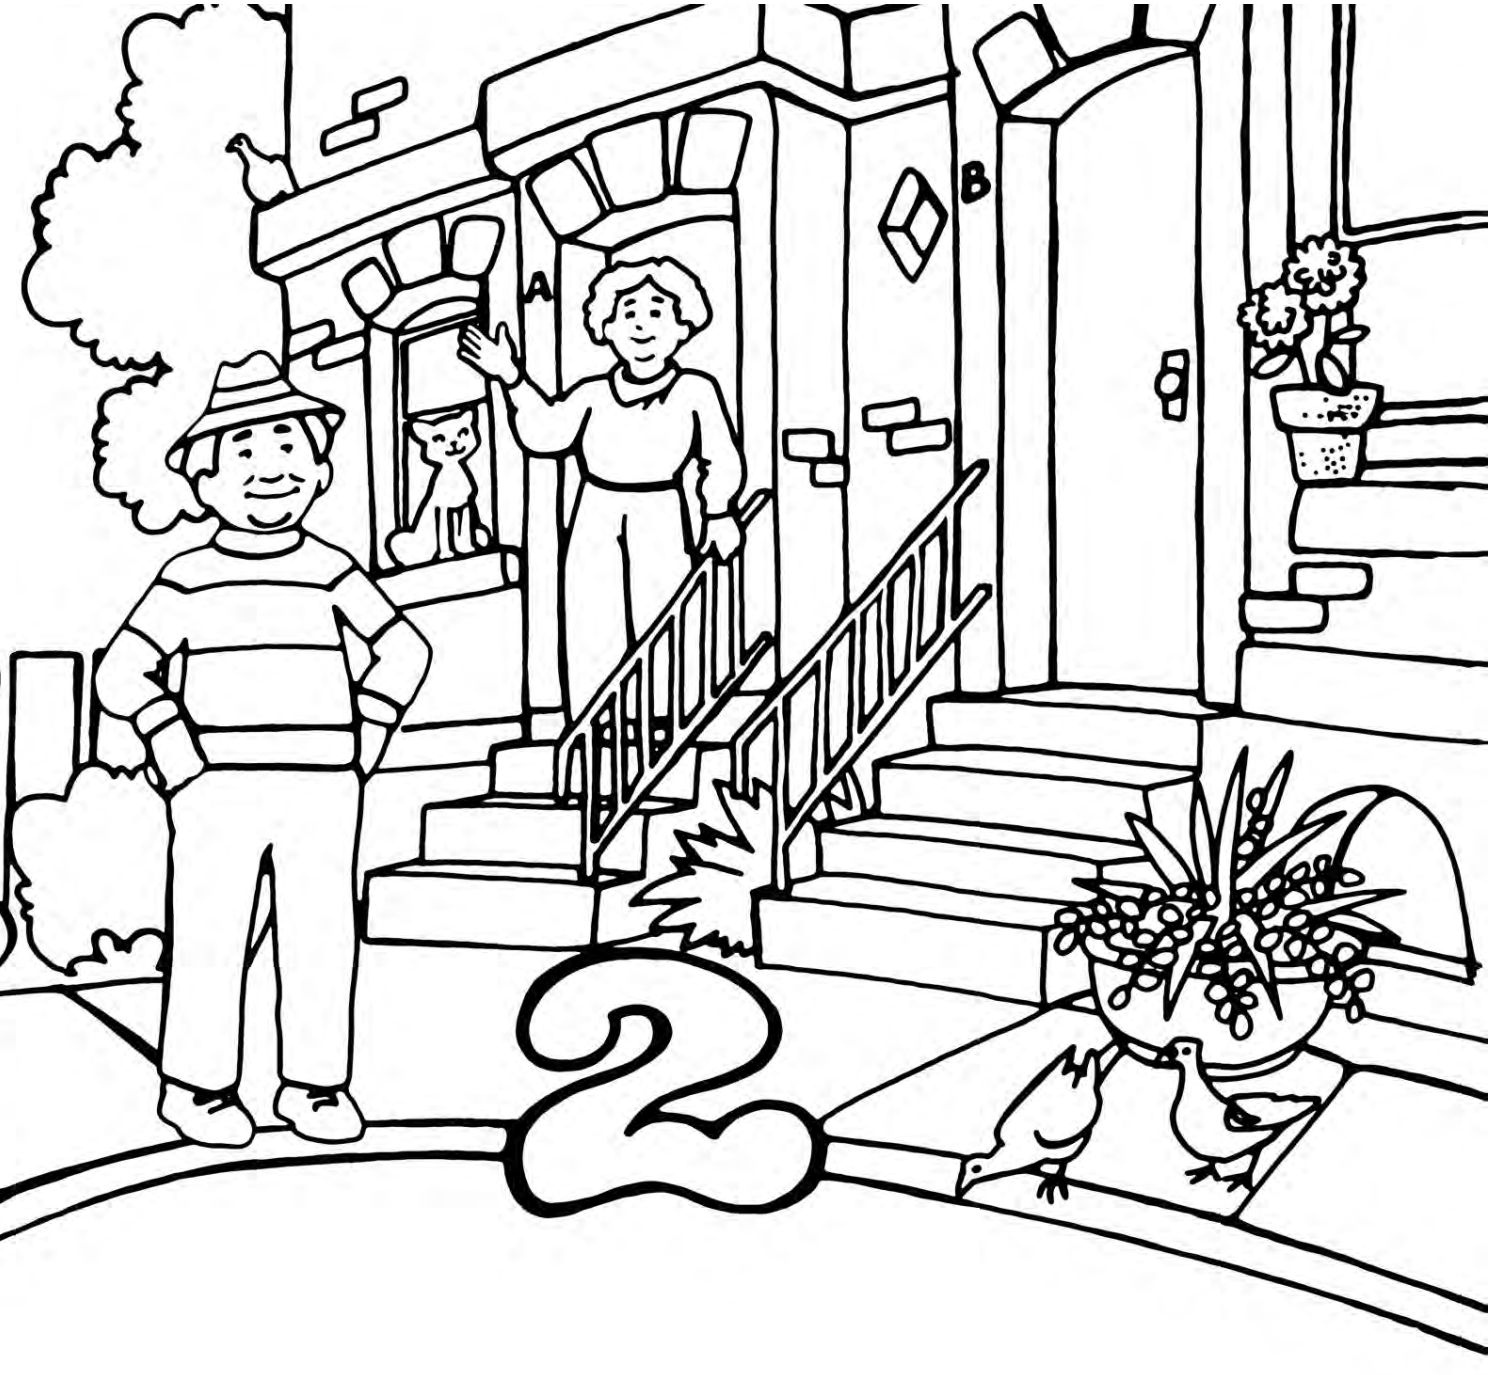


May 2011

“I count!”

says Michelle. It’s important to count yourself in on your census form, wherever you live.

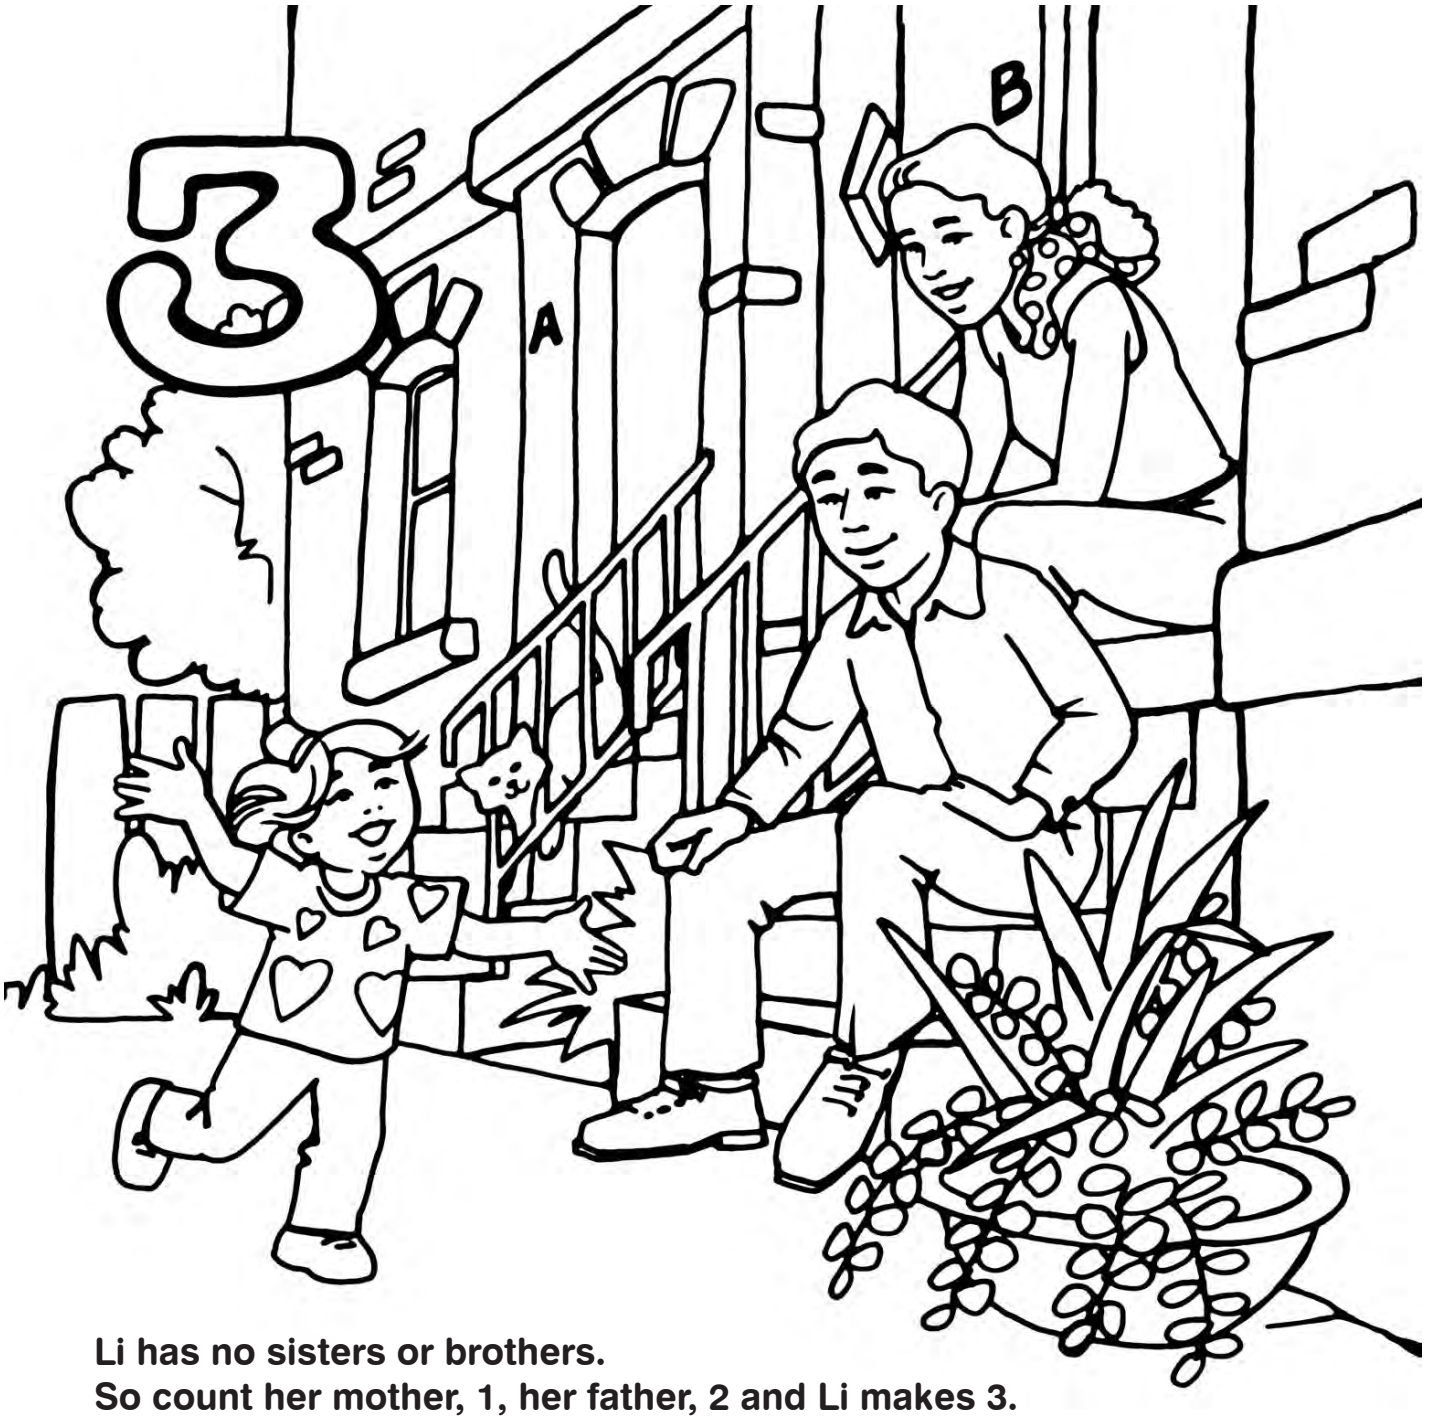




This is where Michelle's grandparents live. We don't count Michelle here. Count Grandfather, 1 and Grandmother, 2. There are 2 people who live in this home.

“Everyone counts in May, 2011!”

says Michelle to Li, going whoosh, down the slide.

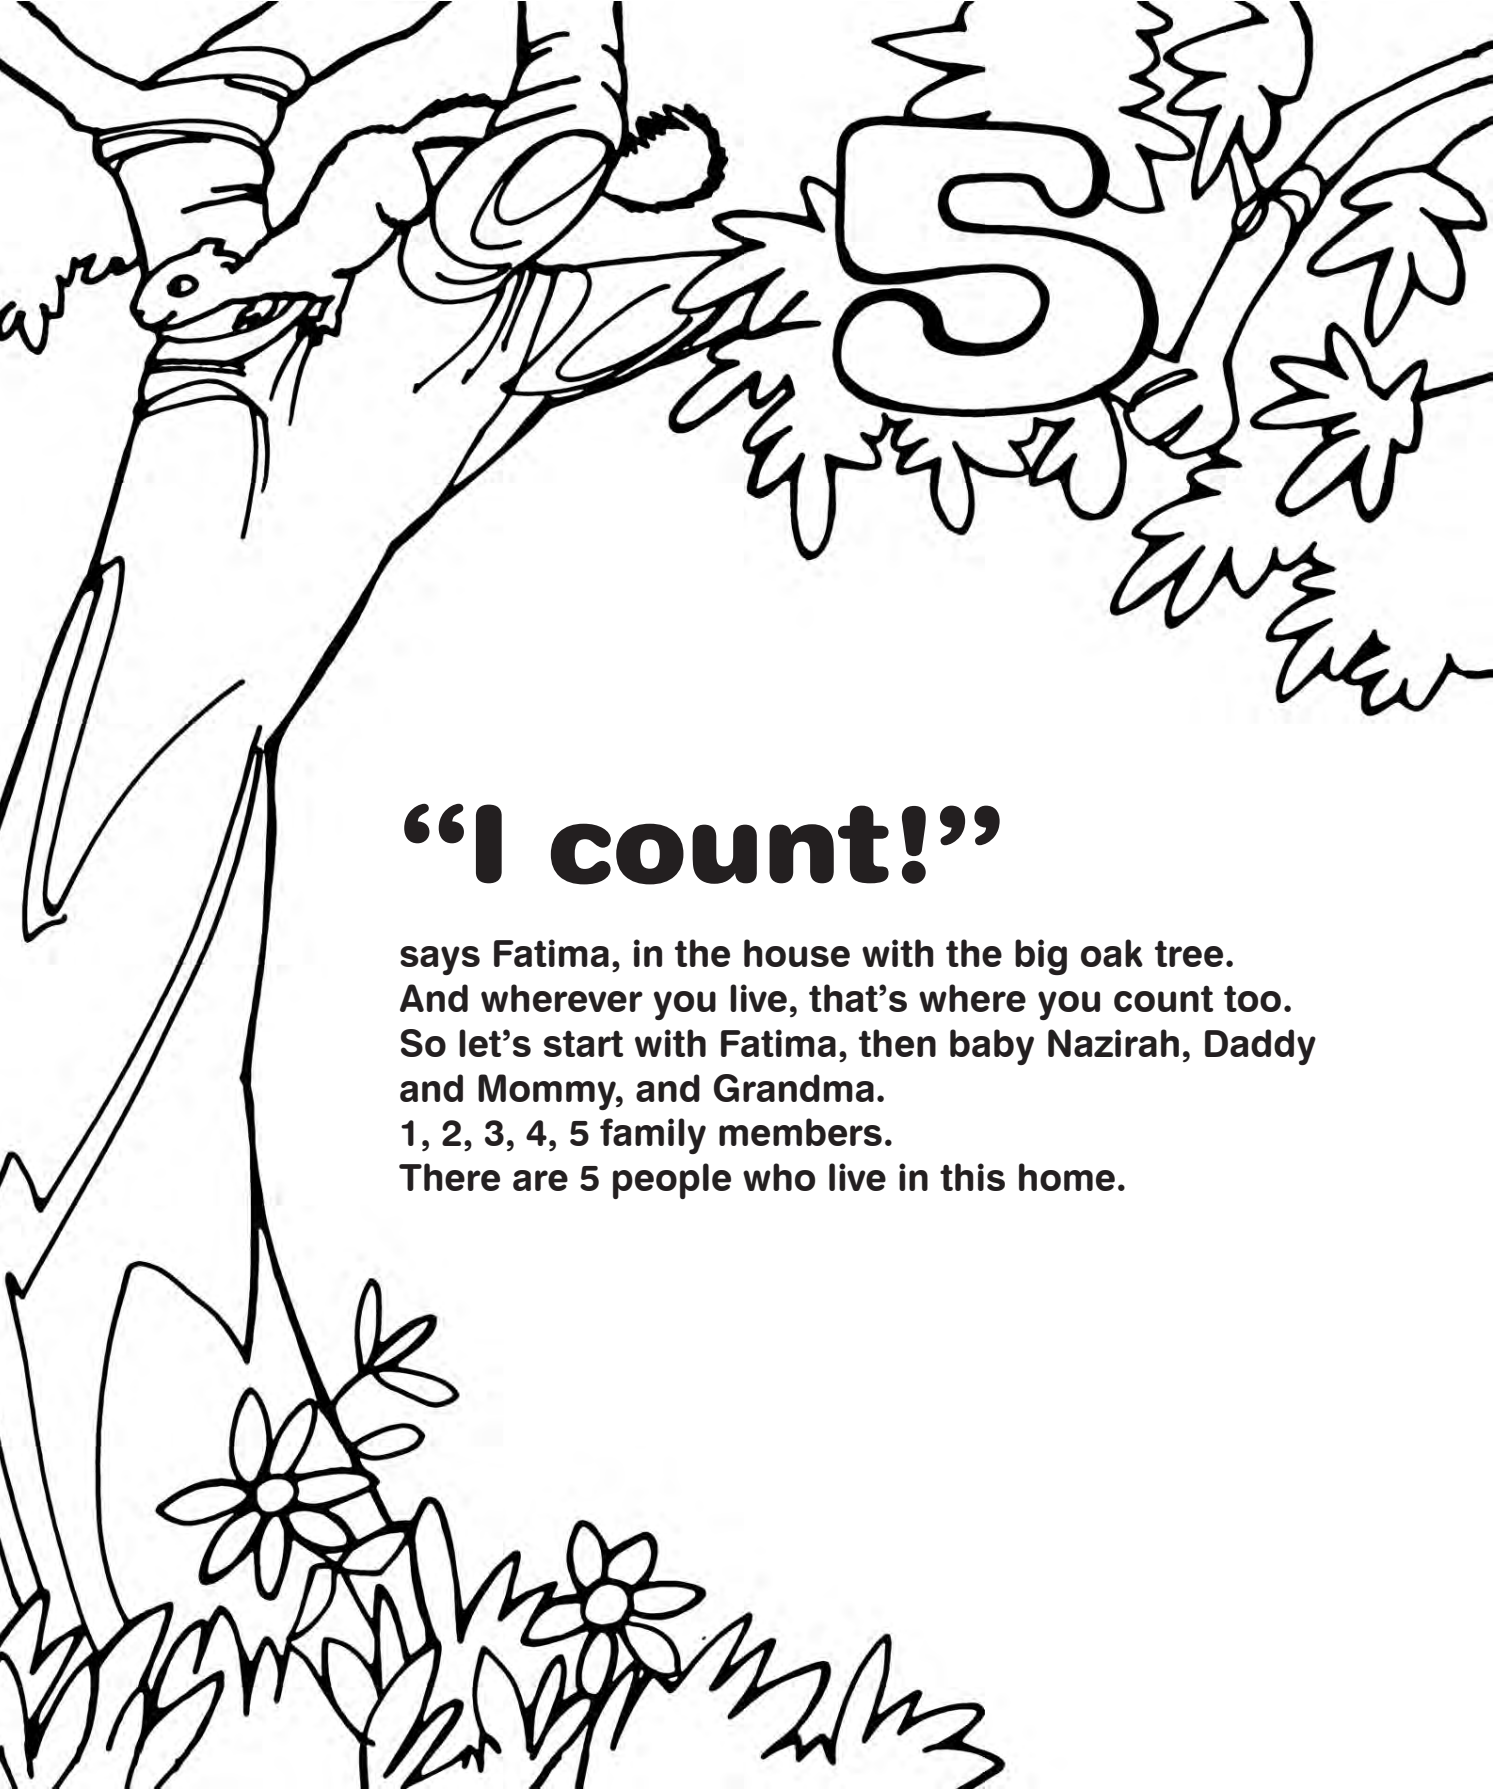


Li has no sisters or brothers.
So count her mother, 1, her father, 2 and Li makes 3.
There are 3 people who live in this home.

“Your family counts too in May 2011!”

says Li to Felix, her friend in the park.
Felix lives with his sister Marie-Claire and her husband Jean.

Felix's family just grew and he's very happy. Marie-Claire has a new baby. Now Felix has a new person to count in his home.
Count Jean, 1, Marie-Claire, 2, Felix, 3 and the new baby 4.
There are 4 people who live in this home.



“I count!”

says Fatima, in the house with the big oak tree.
And wherever you live, that’s where you count too.
So let’s start with Fatima, then baby Nazirah, Daddy and Mommy, and Grandma.
1, 2, 3, 4, 5 family members.
There are 5 people who live in this home.

“You count!”

says Fatima to her good pal, Brad.
Brad lives with his mom and dad, his 2 older brothers and gray-haired Uncle Steve.
1, 2, 3, 4, 5, 6.
There are 6 people who live in this home.

6

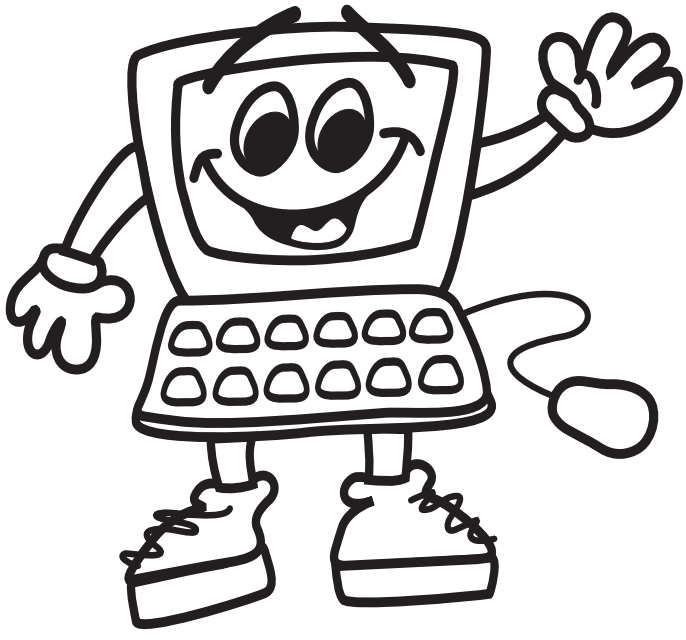
B

“Your neigbours count too!”

Kylie has many neighbours in the apartments down the hall.
Each apartment fills in its own census form.
Yes, everyone counts in their own home.

8
2011

www.census2011.gc.ca



This is Michelle's house. We count Michelle here. There are 2 helpers living on the farm, plus her family of 6. There are 8 people at Michelle's house. Michelle's family uses a computer to fill out their form on-line. Wow! That was fast and easy.

It's important that everyone is counted in the census. Make sure you count every person in your home when you fill in your form.

May 2011!

“Everyone counts”

and that includes you! Count all the children.
1, 2, 3, 4, 5, 6, 7, 8, 9 — you did fine!

But we're missing a child. Do you know who?
Of course, we need to count you!
So get ready to count. We'll start over again.
1, 2, 3, 4, 5, 6, 7, 8, 9...

Count yourself in!
